

DATA SPECIALIST

IS THIS YOU?

You love technology and are an organized, detail-oriented, energetic person with strong background in working with enterprise data and databases.

You would like to work at a company that is at the leading edge of handling data and managing databases.

You are a highly technical individual, with strong problem-solving and communication skills, and comfortable working remotely.

You are self-motivated AND a data enthusiast.

If you answered yes, then we have a position for YOU!

About Distributed Technology Associates India Pvt. Ltd.

Distributed Technology Associates, Inc. (DTA) is a Data and Databases Services Provider delivering a comprehensive suite of data handling services to large and small businesses. Our services are designed to help our customers manage and make sense of the vast amounts of data they are ingesting daily. Based out of Boxborough, MA (USA), DTA provides services to clients in North and South America, Europe and India.

DTA India Pvt. Ltd. is a wholly owned subsidiary of DTA, Inc. (USA).

For detailed information about our company, please visit our website at <http://www.dtainc.in>

Job Summary

We are looking for **developers experienced with data and databases**, to join our India based Services team based in Delhi-NCR. If you are looking for challenge and variety in working with data and databases, you will find plenty of it at DTA. We specialize in handling data through all stages of information life cycle and have been at it for 20 years.

As a member of the DTA India team, you will help our customers ingest / cleanse / harmonize / load their data into relational and graph databases; and then help them analyze that data using traditional and graph analytics. This job requires someone who loves to slice and dice data and has excellent analytical, diagnostic skills, and problem-solving skills.

This position will involve working closely with our clients who are primarily located in USA and Europe. We are very much interested in candidates who have prior work experience with companies in USA and Europe and the willingness to travel to our client offices. While the work will primarily be done from our offices in Delhi-NCR the person filling this position will be expected to travel to client offices.

Our ideal candidate will be detail-oriented, works well with other team members, has **excellent communication** skills, and will thrive in a fast paced, high-energy, multi-tasking environment. This role requires someone who can combine technical and customer-management dimensions along with the ability to project confidence in speaking and presenting in a collaborative customer setting.

Responsibilities Overview

- As a member of our global Services team support our worldwide clients.
- Build and maintain database environments for our data factory projects.
- Assist in building / improving tools and utilities for our Data Factory.
- Provide on-demand support on database related matters to customers of our clients.
- Provide development support for on-going projects to Consulting Services clients.

Job Requirements and Qualifications

- Bachelor's degree in Computer Science with a background in math will be a plus.
- 4 - 7 years of software development / consulting / support experience is required.
- Experience in setting up ELK Stack (Elasticsearch, Logstash, Kibana stack) to process data from multiple data sources
- Experience in architecting, designing, developing solutions using the ELK (Elastic Search, log stash and Kibana) stack.
- Experience in Regex.
- Experience with Kibana visualization strategies, controls, and techniques.
- Experience with Elasticsearch index configuration options, sharding, aliases, etc.
- Experience in log aggregation, log analysis is required.
- Experience in ansible would be preferred.
- Familiarity with Linux diagnostics and tuning; Windows tuning knowledge will be a plus.
- Experience working with one of these databases - Neo4j, Oracle, MS SQL Server, PostgreSQL – would be plus.
- Experience working with public cloud technologies specifically AWS, Azure & GCP would be plus.
- Performance Tuning and Troubleshooting skills are required.

Compensation

DTA India offers a competitive salary commensurate with experience. The benefits include bonus, health insurance, term insurance and generous package of leaves.

Work Hours

This is a full-time position and the work is primarily during the hours 10AM – 7PM IST and from time to time will involve weekend work.

Work Location:

Noida (Delhi-NCR region)
